BONFIRES – SIMPLE STEPS TO REDUCE IMPACT OR AVOID ALTOGETHER

- Compost garden waste or use an alternative disposal service for green waste.
- DO NOT burn any oily rags, rubber, plastics, damp garden waste or other materials that would create heavy smoke or toxic fumes.
- Never light a bonfire when your neighbours have washing drying, or are out enjoying their gardens or have windows open.
- Advise your nearest neighbours before you light a bonfire so they can be prepared for any minor inconvenience that may arise.
- Choose the time of day and weather conditions that will cause the least inconvenience to neighbours.
- Never leave your fire to smoulder for long periods and do not allow a bonfire to continue burning beyond dusk.
- Burn material quickly in small quantities in a hot fire so the minimum smoke is created. Choose your bonfire site carefully, away from trees, fences and windows.
- Beware of attempting bonfires on windy days as it can so easily get out of control.
- Have a hose-pipe and buckets of water handy just in case.
- Never leave a fire unattended.
